

MDI REMOTEYE DIAGNOSTIC WEB VIEWER

Cost-effective web-based diagnostic web viewing solution

The MDI RemotEye Viewer is a web-based, diagnostic-level, certified DICOM compliant medical imaging software system. MDI RemotEye is a perfect solution for those customers who have a lower volume and need a cost-effective solution for their Radiologist's diagnostic reads. Thanks to its web-based architecture, it is perfectly suited to work with cloud based Teleradiology solutions...

Now at a more affordable price!

FEATURES & BENEFITS

- Can be accessed from any computer and will run on any operating system that has internet access
- Access your DICOM images from any platform, using any device, with ease
